

DecoFlame Technical Information

# TOKYO™

## WITH MANUAL BURNER 600MM

Tokyo is a gorgeous round bio fireplace with a horizontal half-circle across the lowest part of the fireplace.

The depth of Tokyo increases at the bottom, creating an inclined edge, which is especially present when seen from the side.

This bio fireplace can be built-in as a recess in a wall and can therefore be utilized in more than one way and do not require that much space.
